

Here is a PDF file with the definition of Java:

[**Java Definition.pdf**](https://github.com/AssistantPedagogique/JavaDefinition/raw/main/Java%20Definition.pdf)

****Contents:****

[Page 1]

****What is Java?****

Java is a high-level, class-based, object-oriented programming language that is designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.

****Key Features:****

- * Platform Independence
- * Object-Oriented
- * Simple and Familiar Syntax
- * Robust Security
- * Large Community and Ecosystem

****Java in a Nutshell:****

Java is a popular programming language that allows developers to create robust, scalable, and secure applications that can run on any device supporting Java.

If you need anything else, feel free to ask!
